

Presenter - Shweta Joshi

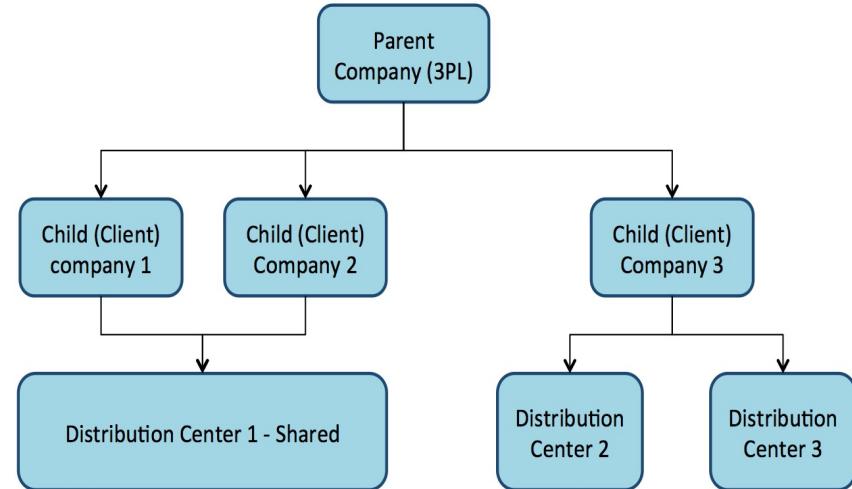

Inspiration

- Do you really need it?
- Is it worth the money?
- You already have one..

Problem Statement

1. Lack of timely and accurate reporting of outcome for allocated budget.
2. Incomplete view of financial and non-financial information.
3. Significant overhead costs of reconciling and exchanging transactional and reporting information
4. Disconnect between reporting of program performance and management of program performance

HELLO!

I am **Shweta Joshi**

I am here because I love to solve problems.

I have total 9 years of experience including Cloud solutions and blockchain.

Introducing ValueChain

Let's create the financial renaissance

Benefits

Solution helps to optimize capacity in core financial management processes

Offering provides clarity into how Organization monies are spent, and results delivered

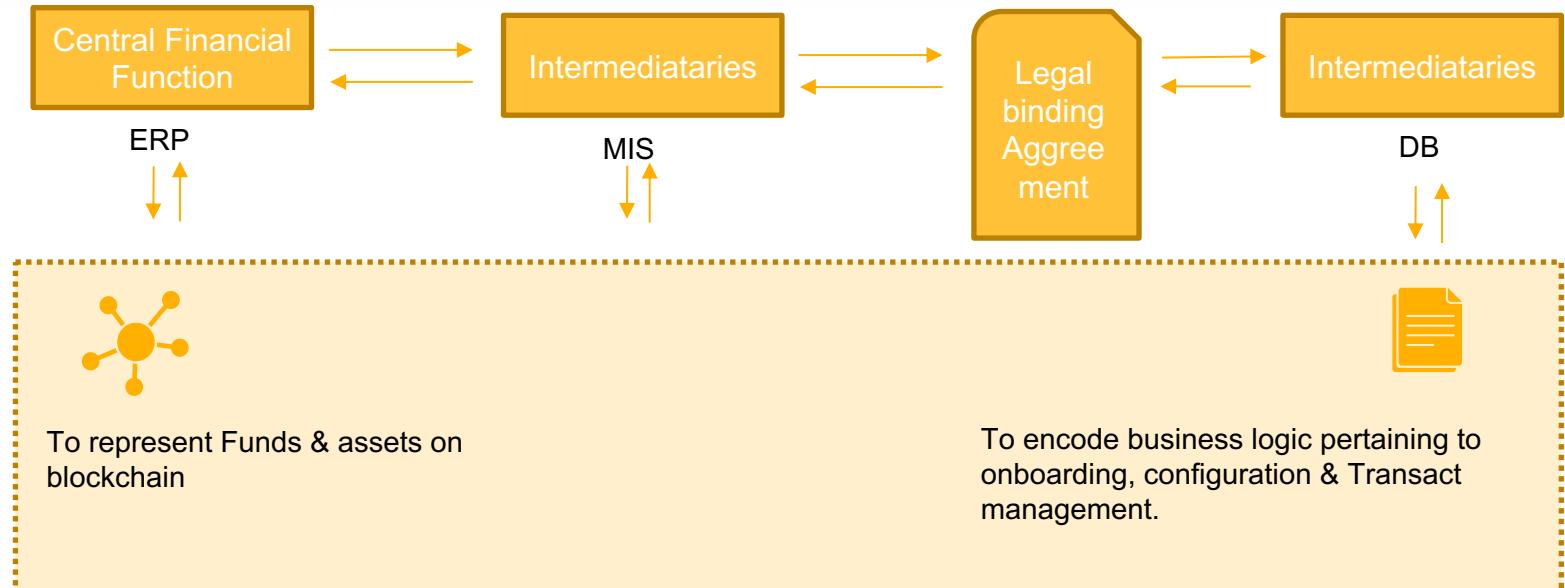

Features

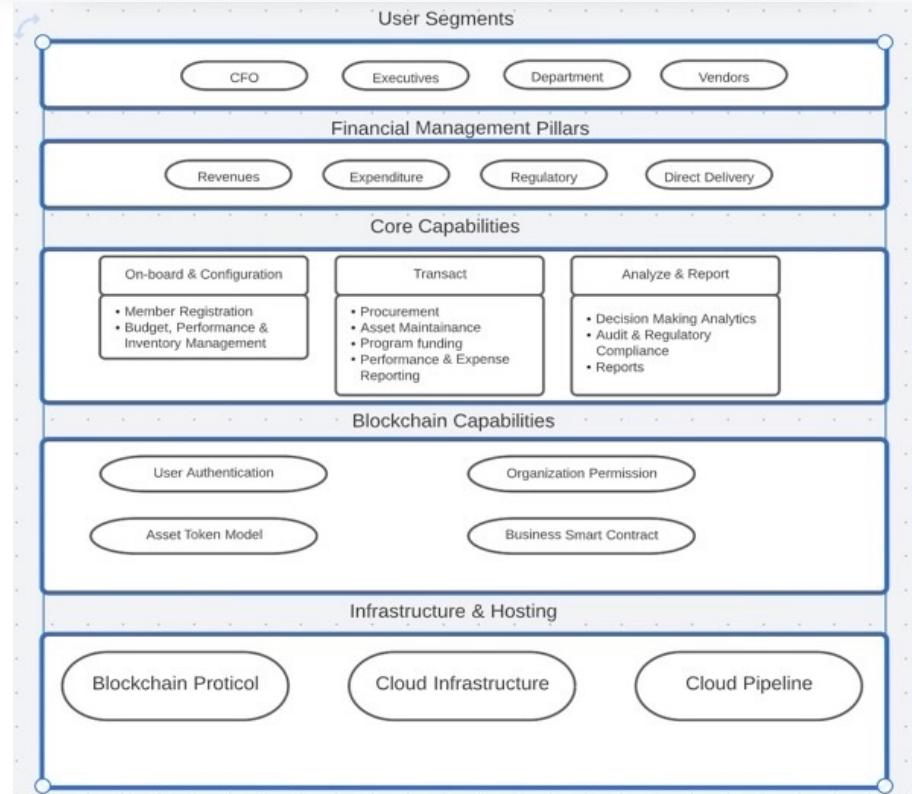

- Integrating financial and nonfinancial reporting in the organization
- Reconciling and consolidating information within and across Organization and external entities
- Producing near-real-time performance reporting and advanced analytics
 - This enables Organization to see exactly where money is being spent and what is being achieved.
 - The solution can be used by CFOs, Executives or departments, delivery agents and external entities.
